AND INFRASTRUCTURE**

**ASI CLOUD
DRaaS**

BE READY FOR ANYTHING WITH ASI CLOUD – DISASTER RECOVERY AS A SERVICE

Is Your Business Ready for the Unexpected?

Data loss and downtime can cripple operations, impacting revenue and customer trust. Without a reliable disaster recovery solution, your business is at risk.

- Unplanned outages disrupt operations and productivity.
- Complex recovery processes lead to extended downtime.
- Traditional DR solutions are costly and difficult to maintain.
- Compliance and security concerns add additional pressure.
- Testing Disaster Recovery often interrupts business as usual.

Seamless Disaster Recovery, Powered by Nutanix

ASI Cloud – Disaster Recovery as a Service (DRaaS) is a fully integrated and automated cloud-based solution that protects your critical workloads. Built on Nutanix technology, it offers rapid recovery without the complexity.

- **Nutanix Replication** – Secure VM replication with flexible RPO settings
- **Automated Recovery Plans** – Pre-configured workflows for smooth failover.
- **Near-Instant RTO** – VMs remain in primary storage, ready to power on.
- **Isolated DR Testing** – Run tests without impacting live environments.
- **Built-In Failback** – Restore workloads back to the primary site after a disaster event.

Key Benefits of ASI Cloud DRaaS

A versatile platform to deploy, run, and protect your workloads.

Faster Recovery, Less Downtime

Minimize disruptions with near-instant failover and automated recovery workflows.

Simple & Unified Management

Easily manage and automate disaster recovery through a single control plane.

Cost-Effective & Scalable

Eliminate expensive secondary DR infrastructure with a flexible cloud-based approach.

Geographic Resilience

Choose between secure DR locations in Auckland and Christchurch for optimal protection.

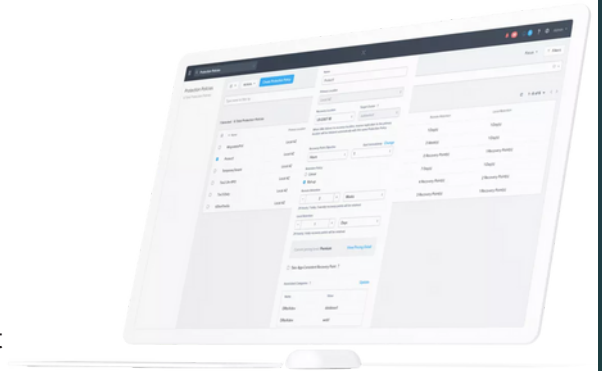

Secure & Compliant

Ensure data integrity and compliance with built-in protection measures and reliable failback capabilities.

Why Choose ASI Cloud DRaaS?

With ASI Cloud, you get a modern, cloud-based disaster recovery solution designed for simplicity, speed, and reliability. Powered by Nutanix, our DRaaS solution allows businesses to confidently protect their mission-critical workloads without the complexity of traditional DR strategies.

You can trust that your workloads are secure in ASI Cloud. We are ISO 27001-compliant, hosted in T3+ data centres that meet the same standards as public cloud providers, and we provide 24/7 security monitoring. Plus, our platform runs on 100 per cent renewable energy in carbon zero certified data centres.
